TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1985

NUMBER 1

	Page English	Page Russian
PART 1		
TELECOMMUNICATIONS		
Volume 39		
SIGNAL GENERATION, CONVERSION AND AMPLIFICATION		
V.S. Golub and V.D. Svyachenyy: Signal "Distortions" when Amplitude-Limiting FM Oscillations	1	53
D.L. Tamm and A.A. Shipitsyn: The Nonidentical Nature of Amplitude Detectors and the Effectiveness of Envelope Feedback	4	56
STEREOPHONIC RADIO BROADCASTING		
V.M. Kolesnikov and M.U. Bank: A Digital Stereophonic Radio Broadcasting System	8	1
V.V. Korguzalov and L.B. Kalinin: Choosing the System for a TV Stereophonic Sound Channel in the USSR	11	4
L.B. Kalinin: A Method of Improving the Parameters of VHF FM Broadcast Transmitters with Mismatched Antennas	15	9
A.P. Yefimov: Cable Stereo Systems	20	12
I.A. Baglarov: Stereo Sound Transmission Over Three-Program Distribution Networks	26	17
COMMUNICATIONS LINES		
A.A. Kashutin, P.M. Lakernik and F.F. Nizametdinova: Methods of Saving Copper in Balanced High-Frequency Cables	29	24
A.M. Kalyagin: An Analysis of the Damage to Underground Communications Cables by Direct Lightning Strokes	33	28
V.A. Breskin and S.G. Yatsenko: Probability Characteristics of Near-End Crosstalk for KSPP Cable in Digital Transmission Systems (DTS)	38	32
V.G. Turov, Ya. V. Alishev, A.A. Mar'enkov, V.N. Uryadov and V.I. Sinkevich: Assessment of Dispersion Distortion in Optical Cables	41	34
FACSIMILE COMMUNICATIONS		
G.F. Bal'kin, V.I. Golosnoi, A.G. Zaichenko, N.B. Mikhalina, and M.N. Sapunkov: A Method of Improving the Noise Immunity of the Modified Huffman Code	45	37
E.I. Gutstein: A Signal Compression Algorithm for Rastered Pictures	49	40
PART 2		
RADIO ENGINEERING		
Volume 40		
V.P. Bakalov: Optimal Space-Time Filtering	52	3
M.A. Bykhovskiy: Multichannel Noise-Cancellers in Communications Systems	58	9
A.I. Bochkarev: Modern Ferrite Devices for the Millimeter Band	64	16

	Page English	Russian
BRIEF COMMUNICATIONS		
A.A. Fomin: Effect of a Reflected Ray on Discriminator Response in a Delay-Tracking System	75	26
S.Ye. Koyan: Derivation of Algorithms for Detecting Pulsed Signals against a Background of Variable-Distance Passive Interference	77	28
V.K. Buteyko: Combined Signal Detection and Duration Estimation Using a Thresholder	81	31
P.P. Mal'tsev: Limit Immunity of a Direct-Current Amplifier to Deterministic Interference	86	48
B.I. Shakhtarin, B.Ya. Kurochka and M.S. Dolgikh: Pull-In Range of a Second-Order Pulsed Phase-Lock AFC System	89	51
A.V. Bezrukov: Phase-Detector Noise Factor	92	54
A.A. Yashin: Standardization of Conformal Transformations by the Christoffel-Schwarz Integral in Designing Hybrid and Semiconductor IC Components	93	55
V.V. Rozdobud'ko: Synchronization of a Semiconductor Microwave Oscillator Operating into an Unmatched Load	96	36
G.I. Veselov and N.I. Platonov: Analysis of Elliptical Waveguides in a Cylindrical Basis	98	64
V.I. Ponomarenko, D.I. Mirovitskiy and I.F. Budagyan: Calculation of the Reflection Coefficient of Electromagnetic Waves by a Compartmented Grating of Conducting Strips	102	68
I.Ya. Kremer and V.I. Kostylev: Detection of an Extended Object in the Fresnel Zone of the Antenna of a Multichannel Receiver System	106	71
S.M. Ryzhakov: Tuning Characteristics of a Resonator Employing Frequency Tuning by Means of a Double-Ring Plunger	110	75
G.I. Veselov and N.I. Platonov: Solution of Two-Dimensional Noncoordinate Problems by the Method of Partial Regions	111	49
Ye.A. Vasil'tsov and V.V. Kryukov: Noise Immunity of Multiplicative Antenna Arrays	114	52
A.G. Antipin and L.A. Dozorets: Row-Column Phase Control of an Optically Driven Equiamplitude Square Antenna Array	118	55
A.T. Polukhin and G.I. Telegin: The Noise of a Fiber Ring Interferometer Caused by Spectral Fluctuations of the Interfering Waves	121	76
A.V. Kharuto: Computer Modeling and Optimization of a Digital Photoreceiver	125	65
FOR THE ENGINEER		
A.Ye. Zhamenskiy and M.I. Nesterov: Design of Matched Transformers for Microwave Power Amplifiers	130	92
Yu.F. Pavlenko and Yu.D. Bolmusov: Generation of a High-Quality FM Signal over a Wide Frequency Band	133	69
V.I. Sokolov and V.N. Kovalenko: Voltage-Pulse Coincidence Circuit	136	72
Yu.S. Rusin: Impulse Noise Filtering in Radio-Electronic Supply Circuits	138	78
V.P. Malugin and V.S. Samoilov: Calculation of the Zeros and Poles of the Input Impedance of an Electromechanical Filter	139	79
M.Ya. Khamitov and V.G. Gusev: Magneto-Electronic Inductance	141	81

NUMBER 2

PART 1
TELECOMMUNICATIONS
Volume 39

POWER SUPPLIES		
V.B. Gaaze: Remote Power Supply System for PCM-480 Line Regenerators	1	43

	Page English	Russian
CIRCUIT THEORY AND FILTERS		
V.N. Zhelnov: Evaluation of the Stability of the Passband of Synchronous Filters	6	47
K.F. Iskhakov and V.P. Styts'ko: The Use of Feedback to Minimize the Number of Components in Gyrator Bandpass Fitlers	9	49
Ye.L. Bachinina, V.S. Brilon and A.L. Yavich: An Autotransformer Using a Uniform Transmission Line of Nonidentical Conductors	12	52
MULTICHANNEL WIRE COMMUNICATIONS		
L.T. Kim: Ways of Increasing the Efficiency of Trunk Line Transmission Systems	15	5
S.U. Klimovich: A Nonclocked Analog-to-Digital Converter	18	8
COMMUNICATION NETWORKS		
M.F. Lutov, K.P. Mel'nikov and P.A. Yunakov: Introduction of Electronic Central Offices into the Metropolitan Telephone Networks	23	15
Ye.I. Shkol'nyy, Ye.O. Naumova and A.D. Kharkevich: A Method of Determining the Additional Number of Lines in Overloaded Groups Taking Repeated Calls and Traffic Measurement Errors into Account	29	20
L.Z. Gil'chenok: An Algorithm for Establishing an Interzone Primary Network	35	25
SATELLITE COMMUNICATIONS		
S.N. Dobromyslov and G.N. Saplov: The INTELSAT System Monitoring Station Equipment	39	28
V.D. Kuznetsov, N.A. Reushkin and V.N. Fadeyev: The Noise Temperature of the Receiving Antennas of the Ekran System	45	32
A.R. Teterin: The Noise Immunity and Potential Cost of a Data Transmission Line with a Repeater	48	34
PART 2 **RADIO ENGINEERING** **Volume 40**		
B. Yu. Kapilevich: Active Microwave Filters	51	3
F.F. Yurlov: The Relationship Between the Pareto Principle and the Reduction of Systems to Comparable Form	59	11
I.N. Amiantov, V. Ye. Ryazantsev, N.V. Savel'yev and V.V. Yurtsev: An Iterative Method of Solving the Wiener-Hopf Equation	64	16
L. Ya. Mogilevskaya, G.S. Grinberg and Yu. L. Khotuntsev: A Computer Study of the Fluctuation Properties of Varactor Frequency Multipliers Allowing for Recombination and Hysteresis Losses	68	21
A.N. Bubennikov, B.N. Mityashev and A.D. Sadovnikov: Multilevel Modeling and Optimization of High-Speed Bipolar Integrated Circuits and VLSI	73	26
BRIEF COMMUNICATIONS		
E.S. Golovin: Space-Time Diversity Reception in Mobile Radio Systems	78	32
G.L. Troynoy: Determination of the Resolving Power of Radiometer TV Systems	81	35
V.V. Markin, V.V. Maslennikov and A.P. Sirotkin: A Car Radio without Inductors	82	36
V.V. Blatov, S.L. Greyner and G. Yu. Federova: A Digital Frequency Detector: Design and Errors	86	39
A.R. Shvartsman: The Theory of a Digital-Analog Automatic Gain Control System in Radio Receivers	90	43
Yu. S. Shmaliy and V. Ya. Barzhin: Reduction of the Effect of Quartz Resonator Anharmonics on the Distortions in Frequency-Modulated Oscillators	93	46

	Page English	Page Russian
N.A. Rubichev, V.G. Sorokin and Z.K. Yakushina: Detection of Changes in the Properties of a Nongaussian Process	96	37
V.P. Volchkov and A.M. Shloma: Adaptive Filtering of Nonstationary Markov Sequences	100	41
N.N. Kryuchkov: Robust Estimation when the Measurement Noise is Variable.	103	44
V.V. Blatov: Limiting of a Narrow-Band Gaussian Process	106	47
P.A. Konstantinov and G.V. Kulikov: Analysis of Modem Noise Immunity for Digital Signal Processing with Minimum Frequency-Shift Keying	108	57
A.N. Kirillin: Potential Noise Immunity of Walsh-Function-Based Parallel Data Transmission through a Channel with Brief Interruptions	112	61
G.D. Mikhaylov and Yu. V. Smirnov: Influence of Spread of the Electrical Parameters of the Controlled Components of the Phase Shifters on the Spectral Characteristics of the Field of an Antenna Array	115	58
V.I. Oznobikhin: Mutual and Self Admittances of Slots with Edges	119	61
A.A. Yashin: Application of a Class of Approximate Conformal Transformations for Calculating Microstripline Parameters	121	64
V.V. Korsunov: Electromagnetic Wave Diffraction at a Reflecting Array with a Dielectric Coating	123	70
S.N. Kaptsov and A.M. Pokras: Design of a Two-Reflector Beam-Guide Antenna with Low Cross-Polarization	126	73
V. Ya. Iskam and V.A. Shaptsev: Properties of the Nakagami-Rice Distribution as a Model for Signal Fading	129	76
A.G. Shlionskiy: Influence of Errors in Specifying the Medium on Waveguide Wave Propagation Characteristics	132	79
FOR THE ENGINEER		
V.N. Nogin and N.B. Dogadin: Efficiency of an Amplifier Operating in a Mixed Mode with Sinusoidal Signals	135	74
V.P. Sedyakin: Digital Filter Design by Home-Produced Microcalculators	139	86

NUMBER 3

PART 1
TELECOMMUNICATIONS
Volume 39

TELEGRAPHY		
P.E. Gurman, V.P. Zamarayev, V.Y. Klubakov and N.A. Plyusnin: Operational and Statistical Monitoring Equipment of the POISK Telegraphic Switching Stations	1	37
S.N. Kanayan, V.A. Martirosyan, K.A. Matevosyan and D.K. Rostomyan: An Approach to the Structural Synthesis of Communications Switching Centers	6	41
V.G. Yakhnin, E.P. Frantsev, V.M. Lozinskiy and E.F. Shnyrev: Apparatus for the Remote Control of Transmitting and Receiving Short-Wave Radio Communications Centers	11	45
L. Ye. Varakin: Noise Immunity and Efficiency of a Broadband Radiotelephone Cellular Mobile Communications System	14	48
G.I. Nikonov: A Method of Calculating the Effective Field Strength in Short-Wave Radio Broadcasting	20	52
N.V. Proshutin: The Realization of a Polyharmonic Mode in Double-Side-Band Transmitters	27	57
ANTENNA-FEEDER DEVICES		
S.P. Belousov and G.A. Kliger: Zenith Antenna Arrays of Plane Radiators	30	60
A.G. Kurashov: A Step Transition without Intermediate Characteristic Impedances	33	62

	Page English	Russian
SECTION HEADING		
V.S. Gol'dshteyn: A Method of Optimizing the Telephone Operational System of Electronic Switching Centers	35	3
A.M. Lipets: A Study of the Efficiency of Microprocessor Devices for Matching the QEALTS Control Equipment with Terminals	40	8
I.V. Stepanova: The Choice of the Conditions for the Functioning of Telephone Station Microprocessors	46	11
PART 2 RADIO ENGINEERING Volume 40		
G.A. Machulka, M.F. Stel'makh and A.B. Uladinov: Laser Technology in Printed Assembly Plate Production	50	3
Ye. R. Milyutin and Yu. I. Yaremenko: A Method of Calculating the Attenuation and Reliability of Atmospheric Optical Data-Transmission Systems	57	11
A.M. Lazarev and Yu. V. Shevchenko: Convergence of a Tuning Algorithm for Adaptive Signal Correctors	63	18
BRIEF COMMUNICATIONS		
V.A. Ivanov: A Model for Analyzing the Electromagnetic Environment in a Bounded Area	68	23
V. Ye. Bukhviner: A Radio Calling System with Message Transmission	72	26
O.N. Partala: Wideband Tracking Frequency Multiplier	74	48
V.K. Kol'tsov: Power Efficiency of HF Amplifiers with a Tracking Supply Voltage, Working with a Mismatched Load	77	51
B.V. Petrov and V.K. Glebin: Analysis of the Interference Generated by Rectifiers with a Capacitive Load	79	53
Ye. P. Metsner: Analysis of the Accuracy of Automatic Frequency Control in a Microwave Oscillator	82	56
D. Ye. Polonnikov and N.V. Dmitriyev: A Method of Improving the Speed of Response of Amplifiers Using Digitally Programmable Gain	84	28
V.I. Ledovskaya and V.F. Shul'gin: Optimization of the Dynamic Range of a Radio Receiver for Third-Order Intermodulation	86	30
A.A. Rysin: An Effective Phase-Lock Loop with a Logical Frequency/Phase Detector for a Master Horizontal Oscillator	89	33
L.N. Danilevskiy, O.V. Korobko and B.L. Lyutarevich: The Factorizability of Space-Time Processing of Broadband Signals	93	64
P.N. Serdyukov, B.P. Burdzeyko and A.V. Naumov: Analysis of a Compensation Algorithm of FM Signal Reception	95	66
L. Ye. Varakin and T.V. Sidorova: Systems of Orthogonal Phase-Shift Keyed Signals with Low First Peaks of the Correlation Function	99	45
V.I. Dolgov: Multibasic Relative Coding Invariant to Four-Fold Phase Indeterminacy	103	48
A.V. Bobrovnikov: Efficiency of a Digital Data-Transmission System with Indirect Detection of Errors	106	51
V.V. Shestakov: Control of Errors in Communication Systems with Space-Time Channel Multiplexing	109	54
V.I. Tsivlin: Asymptotic Expressions for the Variance of the Phase-Difference Estimate for a Random Process with Dependent Observations	111	56
B.A. Murmuzhev: Calculation of the Parameters of a Strip Dielectric Waveguide Phase-Shifter	115	81
B.G. Gorshkov, V.P. Kutakhov, V.V. Sen'ko, G.A. Khatin and V.A. Yaremchuk: Optical Fiber Linear Acceleration Pick-Up	116	83
V.B. Fortes: Variance of the Estimate of the Compression Coefficient of an LFM Signal in the Case of Frequency-Selective Fadings	119	73
R.I. Andreyeva, A.G. Glushchenko, Ye. P. Kurushin and T.A. Chasovnikova: Miniature Three-Millimeter Band Ferrite Isolator	123	76
V.V. Borshchevskiy, V.S. Kolesnikov, V.P. Modenov and Yu.A. Pirogov: Resonance Properties of a Dielectric Prism in a Rectangular Waveguide	124	78

	Page English	Page Russian
Ya. A. Furman: Probability Distribution of the Distances of Pattern Points in a Cluster	126	84
FOR THE ENGINEER		
V.M. Rozov: Calculation of the Ballast Resistor for a Power Amplifier with Control Grid Current	129	89
V.I. Tolmachev, P. Ya. Tsygankov, L.A. Sklyarenko, Z.D. Gerasimova, K.G. Kozhemyakin, A.M. Vasil'yev, V.V. Shuvalov and A.A. Mikhaylov: Transistor Temperature-Dependent Circuit of a Temperature-Compensated Quartz Oscillator, and Evaluation of the Influence of Its Main Parameters on the Frequency Time Stability	132	92
S. Ye. Zirka and Yu. I. Moroz: Calculation of Pulse Correction Circuits in a Pulse Generator	134	86
V.N. Nogin and N.B. Dogadin: An Amplifier with Improved Efficiency and a Transformerless Output	136	89

NUMBER 4

PART 1
TELECOMMUNICATIONS
Volume 39

MULTICHANNEL COMMUNICATIONS

I.M. Dvoretskiy and I.N. Driatskiy: Transmission of Sound Broadcasting Signals Over Primary Digital Channels	1	31
A.D. Voronov and I.M. Pinskiy: Trunkline Reconstruction by Replacing the K-300 Carrier System by the BK-960-2 System	6	36

COMPONENTS AND CIRCUITS

D.Ye. Polonnikov, T.A. Mustafin and V.A. Shishkova: A Voltage Controller for Adjusting DAC and ADC	10	39
A.V. Brunchenko: Digital Codecs with Delta-Sigma Modulation	13	41
V.I. Gvozdev, S.V. Smirnov and A.M. Chernushenko: Multilayer Microwave Volume Filters	20	47
A.V. Semenov and A.P. Kulinich: Analysis of a Balancing Device Based on Identical Coupled Lines	23	49

SIGNAL GENERATION, AMPLIFICATION AND CONVERSION

I.I. Postnikov: A Generalized Relationship for the Capacitance Ratio of HF Quartz Resonators with Lens Piezoelectric Elements	27	54
V.N. Kochemasov and A.D. Revun: A Combined Computational Linear Frequency Modulated Signal Synthesizer	31	57
G.L. Sedletskiy: Adaptive Algorithms for Correcting the Time Position of Pulses of Quasiperiodic Sequences	33	59

TRUNK RADIO COMMUNICATIONS

L.A. Polyakov, N.P. Galkin, V.M. Alekseyev, and A.F. V'yushkov: Equipment for Measuring the Quality of Trunk Communications Radio Transmitters	37	1
M.S. Landsman: Measurement of the Extraneous Radition of Radio Transmitters	43	6
A.S. Adzhemov: Maximum Levels of Efficiency in the Asynchronous Coupling of a Digital Signal with a Synchronous Digital Channel	45	12

PART 2
RADIO ENGINEERING
Volume 40

A.N. Bubennikov, B.N. Mityashev and A.D. Sadovnikov: Prediction and Assessment of Transistor, Integrated Circuit, and Large-Scale Integrated

	Page English	Page Russian
Circuit Operating Capacity Using the Methods and Programs of Multi-level Modeling	52	3

BRIEF COMMUNICATIONS

A.G. Onyshko and V.P. Postyushkov: Reliability of Two-Way Communications in a Radio Link with Controlled Power	57	8
N.A. Sazonov: Quantization Noise for Digital Signal Processing by Harmonic Analysis in an Aperture-Synthesis Radar System	59	10
A.P. Rodimov, Ye. I. Glushankov and V.V. Davydenko: Analysis of Signal Processing Algorithms in Adaptive Antenna Arrays	62	13
K.A. Semenov and V. Ya. Vasil'yev: Computer-Aided Design of Hodographs of Narrowband Filter Attenuation	66	36
G.I. Grishakov: Approximate Analysis of Transients in Electronic Devices	68	39
A.N. Kalashnikov: The Effect of Frequency Discriminator Noise Components on the Incorrect-Reception Probability	71	41
B.A. Kravchenko: The Design of Nonlinear Wideband Phase-Lock Loop Systems	73	43
S.M. Sarayev: Reduction of Interference Susceptibility using the Mixer Channels in an Up-Converter Receiver	75	25
M.I. Bogdanovich: Multiphase Multivibrators with One Capacitor in Transistorized Analogs of a Unijunction Transistor	77	27
M.R. Madarisov: Determination of the Parameters of a Microwave Transistor Represented as an Independent Six-Port	80	29
V.B. Zotkin and D.L. Korobkov: Frequency-Domain Adaptive Matrix Equalization	83	60
B. Andzheychak: Fast Noniterative Tuning of a Matrix Equalizer in the Frequency Domain	86	62
V.A. Golovkov, V.N. Nikitin, K.B. Sukhomlin and R.V. Shamshin: Bias and Variance of the Estimation of the Frequency of a Sinusoidal Signal from the Number of Zero-Level Crossings	89	66
V.S. Sklyar: A Method of Distinguishing Between Two-Level Signals	92	68
V.A. Senderskiy: Maximum Coding Efficiency for a Given Distortion	95	71
V.S. Gutin: Statistical Characteristics of the Spectra of Random Phase-Shift Keyed Signals	97	47
S.A. Galun and T.A. Zhukovskaya: An Estimate of the Frequency of a Bandpass RF Signal	100	50
G.D. Mikhaylov and A.A. Golovkov: A Microwave Reflex Switch Employing a Switching Element with a Negative Active Component of the Imittance	104	79
A.I. Shalyakin: One Possibility for Increasing the Gain of a Corner Antenna	106	81
Yu. V. Pimenov and A.K. Salakh: Analysis of the Effect of a Corner Reflector on the Field Structure of a Line Radiator	107	83
A.I. Babenko, E.F. Zaytsev and A.L. Nikolayevskiy: The Noise Factor of Active Scanning Antenna Arrays	109	57
A.G. Shlionskiy: Forecasting of Duct Radiowave Propagation	112	59
V.N. Mitrokhin: Cylindrical Guided Waves in a Wedge-Shaped Waveguide	114	62
P.P. Bobrov, A.V. Gidlevskiy and Yu. A. Kirsanov: Experimental Study of Unidirectional Ferrite Microstrip Lines	117	64
Yu. M. Bezborodov and V.V. Shevchenko: Microwave Filters using Cross-Shaped Dielectric Resonators	121	67
A.A. Kvitka, B.I. Podlepetskiy and S.D. Chernysheva: Optimization of the Frequency of a Communications Channel for Indoor Radio Telemetry	123	70
P.N. Dagurov and N.B. Chimitdorzhiyev: Diffractive Repeating of Radio Waves over Intersecting Paths	126	73

FOR THE ENGINEER

Yu. I. Sharapov: A Method of Choosing the Heterodyne Frequency when There are no Combination Components within the Intermediate-Frequency Passband	128	92

	Page English	Russian
N.A. Sivozalizov: Asymptotic Expansion of the Rice Integral	132	80
A.A. Titov: A Method of Improving Class-*A* Transistor Amplifier Output Power	134	81
A.T. Mingazin: A Nomogram for Designing Second-Order Chebyshev Digital Filters	136	83
B. Yu. Kapilevich and S. Yu. Safonov: Active Bandpass Filter with Elliptic AFR	139	86

SIGNAL CONVERSION

E.A. Rodin and L.A. Yakovlev: An Algorithm for the Digital Measurement of Phase	1	55
A.A. Alikin, O.I. Gorbunov, V.T. Khrikin and V.H. Shklyar: A Digital Optical-Fiber Transmission System for City Telephone Offices	4	3
V.A. Srapionov: Mode Coupling at the Junctions of Optical Fibers That Have a Spread in Their Parameters	10	10
I.I. Grodnev and T.A. Tvoremirova: Dispersion in Twisted Single-Mode Optical Cable Fibers	13	12
L.L. Ploshay, V.P. Filimonov, V.G. Chertov, V.F. Davidenko, V.L. Kolpashchikov and G.S. Kuchinskiy: Apparatus for Fusing Multimode Fiber Lightguides	18	16
V.P. Inozemtsev and R.Ye. Dantser: Calculation of the Attenuation of Fiber Lightguides when They Are Twisted in a Cable	20	17
T.A. Martynova: Analysis of a Cable Line Employing Single-Mode and Multimode Optical Fibers (with a Small Number of Modes)	26	21
G.A. Cherenkov: Effect of Splices on the Passband of an Optical Cable Communications Line	32	26
Yu.A. Baklunov, Ye.B. Milinkis and P.P. Ovvyan: Measurement of the Attenuation of Optical Cables by the Back-Reflection Method	35	28
V.Ye. Vasil'yev, O.V. Bondarenko, Yu.T. Larin and V.G. Nikolayev: Results of Life Tests on Optical Cables	36	29

DATA TRANSMISSION

S.L. Portnoy and S.I. Kovalev: Matching of Nonbinary Majorant Codes with Multiphase Modulation	39	45
V.A. Rubtsov: Low-Frequency Intersymbol Distortions of a Digital Signal in Repeaters with Quantized Feedback	44	48

	Page English	Page Russian
PART 2 RADIO ENGINEERING Volume 40		
S.D. Mirovitskaya and D.L. Kudryavtsev: Measurement of the Refractive-Index Profile of Optical Fibers	50	4
A.A. Rysin: Controllers for a Flat Matrix Television Screen	56	9
BRIEF COMMUNICATIONS		
B.M. Bogdanovich and L.A. Cherkas: Structural Methods of Improving the Linearity of Radio Channels Based on Sensitivity Theory	61	20
A.A. Petrovskiy and Yu.A. Ganushkin: Synthesis of Band-Pass Digital Filters having a Specified Q-Factor	65	24
B.D. Matyushkin and A.Yu. Vinogradov: Synthesis of Quasi-Optimum Non-recursive Digital Filters	67	26
A.A. Borodyanskiy, V.N. Drynkin and Yu.N. Mamayev: Synthesis of Two-Dimensional Combined Filters	72	30
V.N. Myasnikov: The Analysis of Networks with Operational Amplifiers	75	33
S.Ye. London and S.V. Tomashevich: Limit Parameters of Wideband Transformers	77	35
G.V. Voyshvillo: Determination of the Form and Parameters of Feedback in Amplifiers	81	15
V.I. Uvbarkh: Design of Broadband Input and Interstage Balancing and Transforming Networks for Transistorized Power Amplifiers	83	17
V.I. Gostev: Calculation of Transients in an AGC System with Specified Control Characteristic	87	21
M.P. Savchenko and T.A. Karpinskaya: Equivalent Circuit Parameters and Approximation of UHF Varactor Characteristics	91	24
N.I. Chistyakov: Choosing a Diode Detector Time Constant	94	27
O.B. Semenov: ADC and DAC Nonlinearity Specifications in Audio Signal Processing and Transmission Systems	95	28
V.N. Masliy, Ye.V. Perepelko, V.Ye. Pustovarov and Ye.A. Spasibo: A Controlled Sawtooth Generator	99	31
S.Kh. Karpenkov: The Playback Signal in Thin-Film Magnetoresistive Transducers	100	33
Yu.B. Okunev, N.M. Sidorov and L.M. Fink: Noise Immunity of Incoherent Reception with Single Phase-Difference Modulation	103	36
E.S. Golovin: Frequency-Time Selection of Multiplicative Interference in Mobile Communications Systems	106	38
Yu.I. Nafikov and V.G. Yampol'skiy: Restoration of Input Signals Parameters using System Response	110	42
C.A. Vikulin and V.A. Kuz'min: Determination of Noise Spectral Function Exponent	113	46
V.N. Nikolayenko, B.S. Kozorezov and V.P. Pustovit: A Parameter Analysis of Signals Described by a Lognormal Distribution Law Based on a Small Sample	117	49
N.I. Smirnov: Multicriterial Sampling of an Optimum Complex Signal and a Signal Processor for Asynchronous Data Transmission Systems	120	51
S.P. Plekhanov: Classification and Development of Logic Functions for Multistable Systems	124	55
K.I. Kucherenko and E.F. Ochin: A Microprocessor System for Rank Filtering of Images Using Approximate and Accurate Histogram Readouts	126	69
M.A. Vil'kotskiy and G.P. Lichko: Determination of the Characteristics of Antennas when the Data on Their Amplitude-Phase Distribution are Limited	131	74
V.A. Kravchov and O.L. Ulasik: The Radiation Patterns of a Longitudinal Slot in a Body of Complex Configuration	134	76
A.S. Skryabin: Variance of the Depolarization Coefficient of Radio Waves	138	80
V.M. Bondar: Propagation of an Electromagnetic Wave along a Filamentary Helix	140	82

	Page English	Russian
